Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spaulding et al. USPN 5,337,919 in view of Gerold et al. USPN 7,210,598.

(Re claim 1) Spaulding discloses a medicine dispenser comprising a endless vial feeder (110 figure 11), a chute for directing a falling vial from the feeder (106 figure 11), a robot arm to remove the dispensed vial (83 figure 10), an adjustment table for adjusting a height (107,122 figure 10).

Spaulding does not disclose the endless feed mechanism comprising a partitioned belt.

Gerold teaches a partitioned belt for feeding vials to a chute.

It would be obvious to one skilled in the art to modify the dispenser of Spaulding to use the dispensing belt of Gerold because it is an art recognized alternative and allows for vials to be dispensed more reliably.

(Re claim 4) "vial detectect", "when no vial is detected ... drive means is operated one pitch" (claim 17, Spaulding).

Allowable Subject Matter

Claims 2,3 and 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPNs 5,838,575 and 6,115,996.
